OBSERVATION

Detailed Dental charting from observation (sorting problems)

**Tooth Numbering :** The default numbering system is set in Chart Module Preferences

| 18 | 17 | 16 | 15 | 14 | 13 | 12 | 11 | 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 |

| 48 | 47 | 46 | 45 | 44 | 43 | 42 | 41 | 31 | 32 | 33 | 34 | 35 | 36 | 37 | 38 |

Show Child Teeth

| 55 | 54 | 53 | 52 | 51 | 61 | 62 | 63 | 64 | 65 |

| 85 | 84 | 83 | 82 | 81 | 71 | 72 | 73 | 74 | 75 |

**To select a tooth, click on it.
Click a tooth again to deselect**

OPTIONS:
- **Entering Treatment**
- **Primary vs Permanent Teeth**
- **Charting Missing Teeth**
- **Charting Tooth Movement**

| Charting Tooth Movement

Click on one or more teeth in the tooth chart. Click and drag to quickly highlight multiple teeth.

Select or enter the desired movement in each box. If the value is typed in, click Apply. If one of the six boxes is blank, then not all selected teeth have the same value.

Shift millimeters: Click -/+ to decrease or increase the Mesial, Occlusal, or Labial value by 2.

To indicate a tooth is present but not erupted, enter a negative occlusal value until the tooth is grayed out (at least -12).

Rotate/Tip degrees:

Rotate: Click -/+ to decrease the value by 20.
Mesial/Labial Tip: Enter a value, or click -/+ to decrease the value by 10.
Tooth Numbering: The default numbering system is set in Chart Module Preferences, Tooth Nomenclature.
Save the Tooth Chart: To save click save button to proceed to the treatment plan click Treatment button

Observations can be digitally transformed by adding the observed flaws in the teeth. Treatments and estimated pricing for the observations can be added to the flaws based on the patient approval treatment with set of procedures can be moved to live where treatment module begins.

| Treatment Notes

- Simplified One-Screen Access to a Patient's Entire Visit
- Quickly input procedures, treatment plans, referral notes, codes, etc. with simple clicks
